RONALD F. SHALLAT, M.D. FEBRUARY 17, 2006

			· · · · · · · · · · · · · · · · · · ·				
	1	wife, who was present that morning, and that very	12:44:45	1	Mr. Allen actually had an aneurysm, what do you	12:46:51	
	2	same day, has a describes her husband as having	12:44:49	2	mean?	12:46:55	1
	3	a severe headache and had pain going up the back	12:44:52	3	A. Just what I said. The only	12:46:55	
	4	of his head to the top of his head?	12:44:55	4	there is no proof. There is speculation based on	12:47:03	
	5	A. No, I can't. I mean, I can't put	12:44:56	5	statistics, and I would agree with the statistics.	12:47:06	
	6	myself in her shoes. I don't know. But why would	12:44:58	6	I already said that I think it is more likely than	12:47:09	
	0.75500	two medical personnel who are trained to take	12:45:03	7	not that he did have an aneurysm.	12:47:12	
	8	histories accurately and why would they	12:45:06	8	Q. And there is no proof because we	12:47:14	
		indicate it differently than what the wife's	12:45:10	9	don't there was no CT taken and he was not	12:47:18	
		recollection is later on? They document it. They	12:45:14	10	worked up for having a subarachnoid bleed that	12:47:20	
		wrote it down presumably the same day. And they	12:45:17	11	morning, so we don't have the data that; is	12:47:23	
	11	are trained to take histories.	12:45:21	12	correct?	12:47:25	
	12		12:45:22	13	A. That's correct.	12:47:25	
	13	There is no reason for them to fudge it	12:45:23	14	Q. And that it's "pure speculation	12:47:25	
	14	and say, Oh, no, I am going to make it sound like	12:45:26	15	that his outcome could have been altered if the	12:47:30	
	15	it's ear and jaw and then head versus just	12:45:20	16	correct diagnosis had been made in a timely manner	12:47:32	
- 6	16	headache. I mean, I don't there would be no	12:45:29	17	and appropriate treatment instituted"?	12:47:35	
- 1	17	reason for them to skew it in that direction.		107000	If you could explain that. Why is that	12:47:38	
	18	Q. But given well, Donna you	12:45:37	18	pure speculation?	12:47:40	
	19	know the training of Donna Fearey. She is not a	12:45:41	19	1	12:47:41	(
100	20	medical doctor. You understand that; is that	12:45:44	20	A. Well, I think I explained it more with this the subsequent, you know, things.	12:47:47	
- 6	21	correct?	12:45:44	21	Q. Sure. Please do.	16,7/17/	
1 -	22	A. I understand.	12:45:44	22	1987 - 1987 - 1987 - 1988 - 19	12:47:52	1
:	23	Q. Given what we know about what	12:45:45	23	A. And I think it has to do with the time line of his whole clinical course. I think	12:47:56	1
:	24	happened with this gentleman, that he subsequently	12:45:51	24		12:47:59	
1	25	died of a subarachnoid bleed, do you think that	12:45:53	25	that is my point, that I think it would have been	12.77.33	
		El Company de la	Page 138			Page 140	1
			1 450 150				1
							1
	1	do you have any opinion as to whether or not it's	12:45:56	1	very difficult to have a good outcome in his case,	12:48:05	
	2	more likely than not that he had severe head pain	12:45:59	2	even if the correct diagnosis were made that	12:48:11	
	3	going up the back of his head to the top of his	12:46:02	3	morning based on what I say here.	12:48:14	
	4	head that morning?	12:46:04	4	Q. I mean, it's true, isn't it, that	12:48:18	
1	5	A. I have no way of knowing that. I	12:46:05	5	this gentleman was discharged after given a shot	12:48:20	
į.	6	just have to go by what is written down there.	12:46:08	6	of Phenergan; is that right?	12:48:23	
	7	Q. I am going to go to the next	12:46:10	7	A. That's right.	12:48:24	1
	8	paragraph of your report.	12:46:20	8	Q. He was sent to do whatever he was	12:48:24	(
	9	MR. GUARINO: Is that Exhibit 2 now,	12:46:26	9	going to do; is that right?	12:48:26	Ì
	10	just for	12:46:27	10	A. Mm-hmm.	12:48:27	
	11	MS. McCREADY: Yes, it is. Thank you.	12:46:27	11	Q. He went to and according you	12:48:27	
	12	Q. It says, "Since there was no proof	12:46:28	12	know, you have read the wife's deposition; is that	12:48:30	
	13	that Mr."	12:46:29	13		12:48:31	ļ
	14	MR. GUARINO: Excuse me. I am just	12:46:29	14	A. Yes.	12:48:31	
11		trying to find my place. Hold on a second.	12:46:30	15	Q. And they went Sam's Club and they	12:48:31	
	15	MS. McCREADY: Q. "Since there was no	12:46:34	3		12:48:41	
	16	proof" and I am reading from your report	12:46:38	17	A. They first went to breakfast. He	12:48:41	
1	17	The state of the s	12:46:40	18		12:48:41	
	18	"that Mr. Allen actually had any aneurysm, it is	12:46:42	19	Q. Is that something that is of	12:48:41	
	19	pure speculation his outcome could have been				12:48:41	
1	20	altered if the correct diagnosis was made in a	12:46:43		A. Again, in my mind, that is not the	12:48:41	
	21	timely manner and appropriate treatment	12:46:45			12:48:44	
	22		12:46:48	. E marketine	En la	12:48:48	
	23	I have a couple of questions about that	12:46:48	0.00		12:48:52	
	24		4	24		12:48:55	ា
	25	When you say there is no proof that	12:46:50	25	than not, as you have got me to say, that he had a	12.70.33	1

A000DA7 RONALD F. SHALLAT, M.D. FEBRUARY 17, 2006

1		17,40,57	4	Valsalva maneuver, hold your breath and strain	12:51:0
	minor bleed. But he is walking around, he is	12:48:57	1	lifting a very heavy object, that could certainly	12:51:0
2	going to breakfast, he is keeping it down.	12:49:01	2	adversely affect your blood pressure, intracranial	12:51:0
3	The Phenergan might have helped him keep	12:49:04	3	pressure, causing an aneurysm to bleed again.	12:51:1
4	the food down, but it wouldn't alter any other of	12:49:06	4	Q. And certainly, if you had admitted	12:51:1
5	his symptoms from a subarachnoid hemorrhage.	12:49:10	5		12:51:
6	Q. If you admitted a patient to the	12:49:13	6	a patient to the hospital who had a subarachnoid	12:51:
7	hospital after diagnosing them with a subarachnoid	12:49:19	7	bleed, do you really want him to be lifting	12:51:
8	bleed, would you recommend that they have a really	12:49:22	8	anything?	
9	big breakfast?	12:49:25	9	 A. No weight-lifting. Write that in 	12:51:
0	A. I already told you, I keep them	12:49:26	10	the orders.	12:51:
1	NPO.	12:49:28	11	Q. How about a patient or a person	12:51:
2	Q. Right, you don't give them	12:49:28	12	laying down on a bed? I mean, when you admit	12:51:
3	anything.	12:49:29	13	somebody to the hospital, is there anything you do	12:51:
4	A. So I don't give them oral pain	12:49:29	14	to either elevate the patient's head? Again, a	12:51:
5	medicines, right, so certainly not breakfast.	12:49:31	15	person who has been diagnosed with a subarachnoid	12:51:
6	Q. I'm sorry, let me I am not sure	12:49:33	16	hemorrhage.	12:51:
7	I followed up on that.	12:49:37	17	A. No. It's more a level of comfort.	12:51:
8	Is that because of further testing you	12:49:38	18	If you think the patient has increased	12:51
9	are going to give them or is that why is that?	12:49:40	19	intracranial pressure, which not all subarachnoid	12:51
	A. A combination of things. It's	12:49:42	20	patients do, then you elevate the head 30 degrees,	12:51
0	because, yes, there will be further tests for	12:49:44	21	but only if they have increased intracranial	12:51
1		12:49:48	22	pressure.	12:51
2	which he might receive sedation or anesthesia, and	12:49:51	23	Q. How would you monitor that, the	12:51
3	you would want an empty stomach for that. It's	12:49:54	24	increased intracranial pressure?	12:51
4	also because you don't want him retching or	12:49:58	25	A. Well, if the patient is obtunded or	12:51
!5	vomiting.	Page 142		3	Page I
1	Q. And I don't know whether or not eating a large breakfast would have anything to do	12:50:00 12:50:02	1 2	comatose, then you actually have to put a monitor in their head to monitor pressure. If they are	12:51 12:52
2	with your blood pressure or other or	12:50:05	3	awake and alert, then they probably don't have	12:52
4	electrolytes or anything like that.	12:50:10	4	increased intracranial pressure, if they are	12:52
5	A. No, it shouldn't have anything.	12:50:11	5	talking to you and they are perfectly appropriate	12:52
5 6	Q. So any other reasons why you would	12:50:13	6	and	12:52
	want to make sure that a patient didn't either	12:50:15	7	Q. Is that something that goes back to	12:52
7	have a big breakfast or take anything by mouth?	12:50:18	8	this, you know, monitoring of somebody for a level	12:52
8	A. No. Those two reasons would be the	12:50:20	9	of consciousness, that if their level of	12:52
9	main ones.	12:50:22	10		12:52
-			11		12:52
0.		12:50:23			
0.1	Q. So this patient was discharged, he	12:50:23	2		
.0	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's	12:50:32	12	A. That's correct.	12:52
0 1 2 3	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the	12:50:32 12:50:36	12 13	A. That's correct.Q. So if somebody starts becoming more	12:52 12:52
0.1.2.3.4	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the	12:50:32 12:50:36 12:50:38	12 13 14	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are	12:52 12:52 12:52
.0 .1 .2 .3 .4	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded	12:50:32 12:50:36 12:50:38 12:50:40	12 13 14 15	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure?	12:52 12:52 12:52 12:52
0 1 .2 .3 .4 .5	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck?	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42	12 13 14 15 16	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right.	12:52 12:52 12:52 12:52 12:53
0 1 2 3 4 15 16 17	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes.	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43	12 13 14 15 16 17	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it	12:52 12:52 12:52 12:52 12:52 12:52
0 1 2 3 4 15 16 17	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes. Q. Because they were in the middle of	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43 12:50:43	12 13 14 15 16 17	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it sounds like you could elevate a patient's bed 30	12:52 12:52 12:52 12:52 12:52 12:52
0 1 2 3 4 15 16 17 18 19	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes. Q. Because they were in the middle of moving to Valdez. Is that your understanding?	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43 12:50:44	12 13 14 15 16 17 18	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it sounds like you could elevate a patient's bed 30 degrees. Are there other things you could do to	12:52 12:52 12:52 12:52 12:52 12:52 12:52
.0 .1 .2 .3 .4 .15 .16 .17 .18	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes. Q. Because they were in the middle of moving to Valdez. Is that your understanding? A. Yes.	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43 12:50:44 12:50:46	12 13 14 15 16 17 18 19	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it sounds like you could elevate a patient's bed 30 degrees. Are there other things you could do to affect the increased intracranial pressure?	12:52 12:52 12:52 12:52 12:52 12:53 12:53 12:53
10 11 12 13 14 15 16 17 18 19	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes. Q. Because they were in the middle of moving to Valdez. Is that your understanding? A. Yes. Q. Again, what would either walking	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43 12:50:44 12:50:46 12:50:47	12 13 14 15 16 17 18 19 20 21	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it sounds like you could elevate a patient's bed 30 degrees. Are there other things you could do to affect the increased intracranial pressure? A. Yes. You if they are	12:52 12:52 12:52 12:52 12:53 12:53 12:53 12:53 12:53
10 11 12 13 14 15 16 17 18 19 20 21	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes. Q. Because they were in the middle of moving to Valdez. Is that your understanding? A. Yes. Q. Again, what would either walking around or lifting things, how would that affect a	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43 12:50:44 12:50:46 12:50:47 12:50:49	12 13 14 15 16 17 18 19 20 21 22	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it sounds like you could elevate a patient's bed 30 degrees. Are there other things you could do to affect the increased intracranial pressure? A. Yes. You if they are unresponsive and you have to breathe for them, you	12:52 12:52 12:52 12:53 12:53 12:53 12:53 12:53 12:53 12:53
10 11 12 13 14 15 16 17 18 19 20 21	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes. Q. Because they were in the middle of moving to Valdez. Is that your understanding? A. Yes. Q. Again, what would either walking around or lifting things, how would that affect a person's blood pressure, if at all?	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43 12:50:44 12:50:46 12:50:49 12:50:52	12 13 14 15 16 17 18 19 20 21 22 23	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it sounds like you could elevate a patient's bed 30 degrees. Are there other things you could do to affect the increased intracranial pressure? A. Yes. You if they are unresponsive and you have to breathe for them, you put a tube in their windpipe and breathe for them.	12:52 12:52 12:52 12:53 12:53 12:53 12:53 12:53 12:53 12:53 12:53
10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q. So this patient was discharged, he had a big breakfast, and he walked around Sam's Club. And then did you review the part of the wife's deposition where they went back to the hotel and they unloaded the truck, they unloaded their truck? A. Yes. Q. Because they were in the middle of moving to Valdez. Is that your understanding? A. Yes. Q. Again, what would either walking around or lifting things, how would that affect a	12:50:32 12:50:36 12:50:38 12:50:40 12:50:42 12:50:43 12:50:44 12:50:46 12:50:47 12:50:49	12 13 14 15 16 17 18 19 20 21 22 23	A. That's correct. Q. So if somebody starts becoming more lethargic, that could indicate that they are having increased intracranial pressure? A. That's right. Q. Would that be something so it sounds like you could elevate a patient's bed 30 degrees. Are there other things you could do to affect the increased intracranial pressure? A. Yes. You if they are unresponsive and you have to breathe for them, you put a tube in their windpipe and breathe for them. You can lower the partial pressure of carbon	12:52 12:52 12:52 12:52 12:53 12:53 12:53 12:53 12:53 12:53 12:53 12:53 12:53 12:53

 $\lim_{t\to\infty} \frac{1}{t} = \operatorname{pre}^t X + \frac{Y}{t}$
